Election/Restrictions

Applicant is reminded of the election of species requirement made in this application. Claims 4-9 were previously withdrawn from prosecution; claims 4 and 8-9 are generic claims depending from allowable claim 1 and have been added back into prosecution. Claims 5-7 claim the connector is a torsional spring which is interpreted as reading on the embodiment shown in figure 5 and, possibly, is not supported nor enabled by the specification. Claim 1 claims the connector is "rigid" which conflicts with claim 5 claiming the connector is a spring which is flexible. Additionally, it is believed that the torsional spring would have to be rigidly attached to the frame to properly operate which conflicts the language, "*the connector is rotatable about the substantially horizontal leg.*" Upon allowance of this application, claims 5-7 must be cancelled.

Additionally, new claims 23-29 are withdrawn to a non-elected species having similar limitations to at least original claims 8-9 which were withdrawn according to paper No. 6, dated 8/27/01.

Allowable Subject Matter

Claims 1-3 and 8-9 are allowed.
